**Generic Site Specifications** *(see also Site Specific Application attachments)*

**Any obstructions or clearance limitations less than 10 feet from NET™ location?**

- Yes
- No

**AC power available at NET™ system location?**

- Yes
- No

**Power type:**

- 120 VAC
- 240 VAC

**If solar power is required, distance of NET™ system location from full sun: \_\_\_\_\_**

**Is high-level shutoff switch needed to shut down NET™ system when drum/ tank is full?**

- Yes
- No

**Proposed NET™ location in a:**

- Hazardous area (requiring explosion-proof motor and wiring) **OR**
- Non-hazardous area where standard wiring is appropriate?

**Do contents of holding drum/tank at NET™ location need to be pumped to remote tank?**

- Yes
- No

**If pumping is necessary, what is the run distance between the proposed NET™ location and the receiving tank? \_\_\_\_\_**

**What is the discharge height (above grade) and capacity (in gallons) of the receiving tank? \_\_\_\_\_**

**What type of collection drum, if any, is needed?:**

- Hopper Tank with Secondary Containment, UL rated, Vented, Fuel Tank , with Fuel Gauge
- Stainless Steel 55-gallon Drum with three 2-inch bung holes
- Steel 55-gallon collection Drum with three 2-inch bung holes
- Standard Steel 55-gallon Collection Drum with 2-inch and ¾-inch Bung Holes
- Other Tank \_\_\_\_\_

## **Attachment D: Tank Application**

### **Location of Tank:**

- Parking Lot/Driveway
- Unpaved Area
- Inside Building

### **Tank:**

- Above Grade
- Below Grade

### **Vehicular Traffic at Tank Location:**

- High
- Low

**Type of Tank:** \_\_\_\_\_

**Type of Product:** \_\_\_\_\_

**Thickness of Product:** \_\_\_\_\_

**Flow Rate of Product and Water Flowing into Tank:** \_\_\_\_\_

**Normal Depth to Product from Top of Tank:** \_\_\_\_\_

**Normal Depth to Water from Top of Tank:** \_\_\_\_\_

**Depth to Bottom of Tank from Top Tank:** \_\_\_\_\_

**Please provide drawing(s) including Tank Specifications and Site Features/Facilities**
