OUR CONTRIBUTION TO THE ENVIRONMENT®

EPO™ Defined

Environmental Process Outsourcing (EPO™) is a unique service developed by Environmental International Corporation (EIC) to assist our clients in specifically outsourcing environmental tasks. Based on our extensive experience in the environmental industry, the EPO™ was developed to provide focused environmental support to both private firms and government agencies. The tasks could be as simple as filing a permit application to a more extensive turnkey on-site and off-site service involving comprehensive management of a facility's environmental program.

In essence, EPO™ allows our clients to focus on their core competence while ensuring that the environmental requirements of the business are addressed in a timely manner utilizing the most cost-effective technical resources. To meet these goals, EIC has assembled a multidisciplinary team of experts capable of delivering technically superior services with an emphasis on quality and safety.

Profit from EPO™

EPO™ eliminates uncertainty in addressing environmental issues. Clients are constantly challenged in keeping up with myriads of environmental tasks and regulatory requirements. In addressing these challenges, clients are often diverted from core business and often struggle to find the right talent within the organization to fulfill their environmental obligations. Although some clients have dedicated environmental staff, the projects often require a multidisciplinary staff intimately familiar with current environmental requirements and the latest technologies. In other instances, the project could be, complex, vast, or unique: in-house resources are constrained and unable to address the issues. These deficiencies can lead to costly solutions that can perpetually drain profits. At the other end of the business spectrum, a small company with limited resources and personnel must periodically collect and analyze samples. Costly mistakes can occur due to lack of

"... is awarded this Certificate of Achievement for Outstanding Environmental Work Performed at the Woodbury, NJ Terminal"

training, employee turnover, or inadequate personnel.

EPO™ provides an assurance that the projects are carried out in a timely, cost effective manner, by trained professionals. EPO™ not only provides an added level of security but also ensures that each task receives immediate attention eliminating costly liabilities and fines. The end result is a vast improvement in profit margins and reduction of liabilities.

Who should use EPO™

- Small and medium sized firms without dedicated in-house full or part time environmental staff.
- Large firms for temporary assignments.
- Firms managing complex, vast, or unique projects.
- Anyone requiring third-party environmental review and management.

EPO™ Implementation

- EPO™ specialists from EIC conducts a telephone interview or site visit.
- Client presents short-term and long-term goals and objectives.
- EPO™ specialist identifies tasks that are appropriate for outsourcing and presents a technical and cost proposal.
- Client enters into a contract with EIC to outsource selected task(s).
- EIC assigns an EPO™ Task Order Manager (TOM).
- TOM manages the tasks in accordance with contract terms and conditions.

EPO™ OFFERINGS

PLANNING & TRAINING

- Project Management Services
